Technical Skills: Python | Flask | JavaScript | React | Redux | Express.js | Node.js | AWS | SQL | PostgreSQL | SQLite | SQLAlchemy | Sequelize | HTML | CSS | Git

Relevant Skills: Data Analysis | Customer Service | Excel | NetSuite

PROJECT EXPERIENCE

Allocate | Python | Flask | JavaScript | React | Redux | AWS | PostgreSQL | SQLAlchemy | HTML | CSS [Github](#) \ \ [Live](#)

A web application where users can split and manage expenses with friends.

- Created expense groups to allow users to easily organize and categorize expenses
- Integrated with AWS S3 using Boto3 to host and stream user-uploaded receipts to ensure scalability and data redundancy
- Utilized Flask's CSRFProtect extension to ensure incoming server requests are being made by the currently active and authenticated user

Pour'd | Python | Flask | JavaScript | React | Redux | PostgreSQL | SQLAlchemy | HTML | CSS [Github](#) \ \ [Live](#)

A web application where users can leave reviews for drinks.

- Designed and implemented a custom search bar to look up existing drink names and dynamically list the search results as the user types
- Collaborated with team members by dividing features, reviewing code, testing each other's code, and resolving any merge conflicts in GitHub
- Built a many-to-many relationship between users (friends), while supporting features like accepting and rejecting friend requests, displaying all pending friend requests, and removing users from the friends list

Airbnb Clone | JavaScript | Express.js | Node.js | React | Redux | Sequelize | PostgreSQL | SQLite | HTML | CSS [Github](#) \ \ [Live](#)

A web application where users can create and manage places to stay, and leave reviews for them.

- Integrated express-validator to enforce validation constraints on user inputs when creating a user account and logging into the application
- Created custom SQL queries using JOIN statements to query on multiple tables in order to reduce the number of database transactions
- Assigned and stored user-specific JWT token as a session cookie to ensure user security as they navigate and take actions on the web app

WORK EXPERIENCE

One Medical | *Senior Accountant* | San Francisco, CA Jan 2023 – Present

- Reconcile 53 accounts, keep track of property tax for 100 offices and make sure they get paid, assist with treasury operations including coordination of bank account set up and cash management
